

mellijelli Immuno+

Organic Honey flavored with cocoa&orange +Echinacea purpurea extract

Delicious natural energy with an immunity boost

What It Is

MelliJelli Immuno+ is a new version of our kids' favorite — honey + cocoa — now with a functional twist: **Echinacea purpurea** extract, a plant traditionally used to support the immune system during seasonal changes, school exposure, or times of stress.

We combine:

- Bee **honey** – nature's energy and antioxidant powerhouse
- Natural **cocoa & orange** oil – rich taste kids love
- **Echinacea purpurea** – to gently support immunity in a child-friendly format

No additives. No artificial flavors. Just tasty, wholesome support for growing bodies.

Why it works?

Echinacea purpurea is one of the most researched botanical ingredients for immune health. Known for helping the body resist infections and **support natural defenses**, it's especially popular during school season.

Studies^{1,2} suggest that Echinacea may:

- Stimulate innate immunity
- Reduce frequency and severity of colds
- Shorten recovery time

Combined with honey, which has **natural antibacterial** and soothing properties, MelliJelli Immuno+ becomes more than a treat — it's a daily **wellness ally** for kids.

Who It's For

- School-age children (3+)
- Parents looking for natural support instead of synthetic syrups or lozenges
- Busy families who want health *and* taste in one product

How to Use

- With breakfast or afternoon snack
- As a smart treat in lunchboxes
- One pouch a day during seasonal transitions
- On toast, in warm milk, or straight from the pouch

Naturally better

- **100% organic (NO pesticides & GMO)**
- **real flavor from natural ingredients**
- **NO refined sugar, NO allergens**
- **Kid-approved taste**
- **Bee-friendly & sustainable**

Note: Echinacea purpurea is traditionally used to support the immune system. This product is not intended to diagnose, treat, cure or prevent any disease.

Not a substitute for a varied diet. Suitable for children 3+ under adult supervision.
